

Dear Colleagues,

In 2022, ESTRO felt strong with the support of its members. The Society engaged with the RT community thanks to networking, congresses and courses providing access to the latest science and developments in radiation oncology.

Today, for the first time in ESTRO history, the milestone of **8000 members** has been reached, all united by a common vision: 'Radiation Oncology. Optimal Health for All, Together'.

**In 2023, the ESTRO institutional membership represents an added value for your department and your institute.**

The ESTRO Institutional membership **is especially designed for centers and their oncology teams.**

Some of the top benefits are:

- valuable advantages for your team members, such as the access to the Green Journal and the most recent articles and guidelines, networking opportunities at a global level, substantial discounts on our [ESTRO 2023 Annual Congress](#) and over [30 courses!](#)
- additional saving on the membership price for your team, increasing for larger groups
- increased visibility for your institute on the ESTRO website and during the ESTRO annual congress (complimentary booth in the communities pavilion)

For more information, please refer to the [institutional membership webpage](#) and [application form](#) or contact the ESTRO membership team and ask for a simulation at [membership@estro.org](mailto:membership@estro.org).

We are looking forward to our fruitful collaboration in 2023.

Best regards,

The ESTRO Membership Team
